Inter-Institutional Collaboration: Discussion Summary

Any form of collaboration begins with a source of inspiration (whether ongoing or new)—part of that will be a motivation process

Feasibility study

- Can we do this?
- Do we have the resources?
- Can we define the ownership?

Which institutions do you want to collaborate with?

When you have agreement you have some kind of contract?

- What are we going to do?
- Who is going to do what?
- The institution also has to agree.
- Objectives and outcomes
- At this point we identify a project manager and a project plan.

Now we jump straight to outcome

- we never actually did any work, which often happens in collaborations
- an assessment of the outcome
- and round again

Need a problem solving unit (legal, contractual). How would that work?

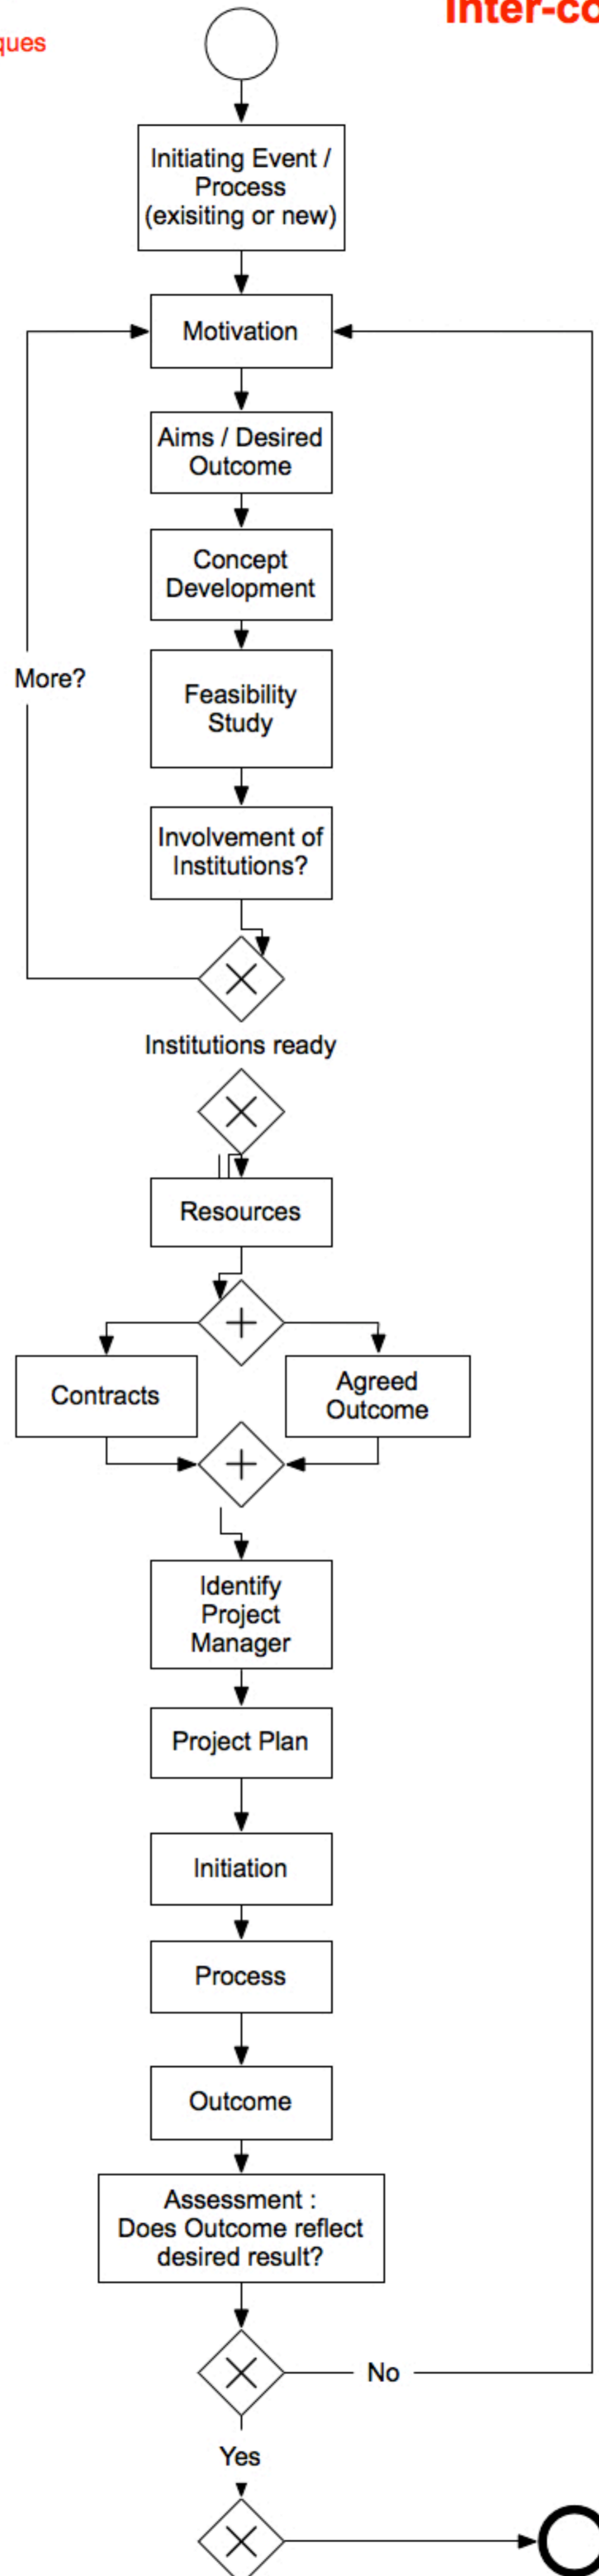

Ext/Int Events and Influences

Source of 'Inspiration'

- Trigger Examples**
- A collaboration to aid the development of conservation techniques
 - Exhibitions
 - Research
 - Database Activities
